Dept./Division	Graphics Designer	Name of finished Product	VITZAI - A fitness app
Name of HOD/ Supervisor With e-mail id	Mr. Bhavik Jinjala bhavikjinjala@infinitedevelopers.in		
Main points of the day	Introduction to tools & project overview		
<ul style="list-style-type: none">- Today, at first day of internship at infinite Developers, I was introduced to the design tools figma and Adobe illustrator, which I would be using throughout internship. I spent time familiarizing myself with interfaces and exploring basic features like shapes, layers, alignment tools and color palettes.- I practiced creating simple UI components and layout arrangements to understand how design flow works in new applications. The senior designer also gave me walk-through of main project, VITZAI, a fitness app aimed at providing personalized health experiences.- I reviewed some existing mobile app layouts and user interfaces to build my understanding of what makes a clean, functional and user-friendly design.- It was productive first day, laying foundation for the days ahead.

Dept./Division	Graphics Designer	Name of finished Product	VitzAJ - A fitness App
Name of HOD/ Supervisor With e-mail id	Mr. Bhuvik Jinjulu bhuvikjinjulu@infinitedevelopers.in		
Main points of the day	Wireframing login and Home screens		

- I focused on 2nd day to creating low-fidelity wireframes for the login and home screens of app.
- Starting with sketches on paper, I transferred the layouts into Figma. I used frame tools and grid systems to align content and maintain spacing. My mentor explained the importance of reusable components, and I tried creating buttons and input fields that followed design consistency.
- I also played around with layout options to make sure the screens would be intuitive for new users. By the end of the day, I had completed basic wireframes with placeholders and alignment guides, ready for review.
- This helped me understand how to structure an interface with usability in mind.

Main points of the day	Creating Icon Sets and Buttons	
<ul style="list-style-type: none">- The task today was to build out visual components like icon sets and buttons. I explored different icon styles using Figma plugins and selected a minimal, rounded set that complemented the fitness theme.- I created button variations and designed them using gradients, shadows and border radius to enhance interactivity.- I also build hover and pressed states for the buttons to reflects user feedback on tap or click.- I learned how to use auto layout and constraints to make sure the elements were scalable and mobile-friendly.- This day helped me to realize the importance of micro-details and consistent styling in UI design.

Name of HOD/ Supervisor With e-mail id	Mr. Bhavik Jinjala bhavikjinjala@infinitedevelopers.in			
Main points of the day	Building the VitzAJ Branding Kit			

- Today, I created the brand identity elements for VitzAJ. I selected a dynamic, high-energy color palette that reflects motivation and movement. I also finalized the typography system - using a bold sans-serif for heading and clean typeface for body text.
- I collected and arranged icon styles into a brand asset kit. All visual elements were grouped and named systematically.
- This kit now acts as a single source of truth for the design team.
- I also learned how to apply color tokens and text styles in Figma for quicker updates later.
- It was exciting to set the creative direction for the entire app.

Main points of the day	Designing Social Media Templates					

- Today, I focused on designing marketing materials such as social media templates for Instagram posts and stories.
- I used Canva and Figma to maintain branding consistency across platforms. Each design followed a grid system and included motivational quotes, feature highlights, or fitness tips. I made sure the visuals were adaptable to different mobile screen sizes and tested their alignment and spacing.
- I also worked on promotional banners for mobile use, incorporating key visuals from the app UI.
- These materials were prepared in multiple formats for use in social campaigns.
- It was a creative shift from UI to graphics marketing design.

Main points of the day	Developing login & home prototypes		

- Today, I started developing a functional Prototype of the login and home pages. Using Figma's Prototyping tools, I connected pages with interactive elements like button clicks and transition effects.
- I made adjustments based on mentor feedback regarding spacing, text alignment, and flow.
- The prototype was tested for natural navigation and responsiveness.
- I also previewed how the design would behave on different screen sizes, especially smartphones.
- This step made the app feel much more realistic and interactive, which was very satisfying.
- By the end of the day, I had a smooth prototype ready for demonstration.

Main points of the day	Designing Dashboard & fitness tracker		

- Today, I designed the app's dashboard and fitness tracker screens. These are critical for showing user activity, goals and progress.
- I used card layouts to separate calorie count, workout summary, and daily steps. I applied auto layout features to make the design adaptive and maintain spacing between elements.
- For the tracker, I used progress bar, streak indicators, and motivational text to keep users engaged.
- I also added quick-access icons for navigation. These screens required balancing data display with simplicity.
- It took some trial and error, but I was happy with the result.

Main points of the day	Responsive Testing and UI Refinement					

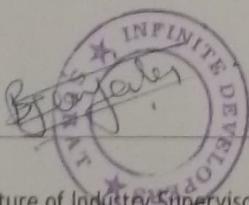

- This day was spent testing the UI on different device sizes like tablets and smartphones.
- I resized frames and adjusted padding and font sizes for consistent appearance across breakpoints. I identified some layout breaks and fixed those by using constraints and auto layout tools.
- I also revised a few design components that looked too small or crowded on smaller screens. I received detailed feedback from my mentor about improving visual hierarchy and white space. I refined the color contrast and button positioning to enhance accessibility.
- This process helped me understand responsive design much better.

Main points of the day	Notifications and Feedback UI Design							
<ul style="list-style-type: none">- Today, I worked on designing in-app notifications and feedback forms. Notification banners were created in a non-intrusive way to alert users of goals, reminders, or new content. For the feedback form, I designed a smiley-based rating system with a textbox for additional comments.- I also added subtle success animations and thank-you screens after submission. These details are small but play a big role in user satisfaction.- I also tested how these elements would appear on real devices and adjusted spacing accordingly.- This gave me insights into designing for real-time interaction.

Main points of the day	Developer Handoff & style Guide creation				
<ul style="list-style-type: none">- Today, I created the final design handoff file for the developers.- I organized all screens in figma, grouped components, and cleaned up the layers panel. I built a comprehensive style guide that documented font sizes, color codes, button states and spacing rules.- I used proper naming conventions to make everything easy to find and implement. This handoff package was reviewed by the team and confirmed for development use.- I also learned about design-to-development collaboration and how designers make it easier for coders to build UI accurately.

- On the last day, I finalized everything for submission.
- I exported all visuals in high-quality PNG and SVG formats. I created a folder structure to organize assets like logos, banners, screens, and documentation.
- I also finished my internship presentation with slides showing all my work - from wireframes to final UI and promotional content.
- Additionally, I made a short app demo video using Figma's prototype recording.
- It felt great to look back and see how much I had learned.
- This internship helped me gain both design knowledge and confidence in working professionally.
